Do you want to find out how tech-based research gets translated to the marketplace? And would you like an opportunity to get to do it working in collaboration with faculty in a research lab? If so, UConn's Experiential Entrepreneurship Research Experience for Undergraduates is for you!

E²REU Is:
A 10-week summer integrated, hands on, laboratory research and entrepreneurship training experience for undergraduates.

Students Will:
- Learn from successful entrepreneurs what it takes to build a viable technology product and startup venture.
- Participate in laboratory research that can lead to commercializable technologies.

Eligibilty:
This program is for entrepreneurial-minded students entering junior or senior year at Connecticut institutions.

Please visit **ee-reu.engr.uconn.edu** to apply online.

Application Deadline: March 16, 2020
